Examiner: Terrence R. Till  
Group Art Unit: 1744

**REMARKS**

By the present amendment, the Abstract and the Specification have been amended as requested by the Examiner. It is believed that the amendments to the Abstract and to the paragraph beginning on line 66, column 7 and extending through line 10, column 8 overcome the Examiner's objections to this part of the Specification. Further, the Abstract has been amended to delete material which does not relate to the claimed invention. The Abstract now has between 50-150 words.

Also enclosed herewith is the original U.S. Patent No. 6,286,181B1 which forms the basis for this reissue application. Applicants hereby surrender the original patent in favor of the issuance of a reissue patent based on the present application.

It is believed that the application is in condition for allowance. Allowance of the application is respectfully requested.

Respectfully submitted,

Gary A. Kasper and Timothy E. Kasen
